

# IRONWORKER CONTRACTOR PROFESSIONAL DEVELOPMENT

## Summer Training Program in Ann Arbor, MI

### July 16-20, 2018

Date	Course
July 16-20	Construction Contracting Business Fundamentals Academy Track 1: Establish Your Business: This course is designed for current and future contractors who desire to develop fundamental business skills. Length: 5 days.
July 16-20	Advanced Layout and Total Station: Use drawings and apply principles of trigonometry and the Cartesian coordinate system to program and operate a total station. Length: 5 days.
July 16	Introduction to Lean Project Delivery: Attain a broad awareness of the vocabulary, fundamental principles and basic practices of the Lean Project Delivery system. The course serves as a framework for learning how to apply Lean thinking and methods to deliver significantly greater value on. Length: 1 day.
July 17	Introduction to Lean Project Planning: This course involves engaging exercises that enable participants to experience the contrast between traditional project management and managing using the Last Planner System® of production control. Participants will experience how the Last Planner System® and Lean approach can help create and maintain reliable workflow on a project and provide a dramatically improved construction experience. Length: 1 day.
July 16-17	Project Leadership and Project Management: This course focuses on how to provide both project leadership and project management. Explore the differences between project witnesses and project leaders and how contractors can foster those behaviors to build best-in-class performance. Length: 2 days.
July 17	Bluebeam Revu Basics for Windows and iPads: Organize, mark up, edit and track comments in a PDF drawing set using a Windows computer or iPad. Manage documents using Studio Projects, collaborate in real time using Studio Sessions, and learn how Revu can help you organize and manage documents. Length: 1 day.
July 18	Measurements and Takeoffs Using Bluebeam Revu for Windows: Use Revu's built-in measurement tools for takeoffs. Learn how to export data for estimation and perform efficient takeoff workflows using new measurement features in Revu eXtreme 2017. Length: 1 day.
July 18-19	Lead With Respect: Building a great organization requires effective leadership, and leadership skills can be learned. A key, often misunderstood is what it means to "lead with respect." This course explores why leading with respect is essential to a successful organizational transformation, what respect looks like in practice, and how it impacts your people and drives them to implement lasting change. Length: 2 days.
July 20	Improving Construction Productivity: Effective performance in the field results from working smarter not harder. This course will assist participants in identifying techniques for improving company processes and productivity. Length: 1 or 2 days. Instructor: FMI.
